

IDA Sky Quality Data Sheet: This table will help track the improvement, degradation, or stability of night skies in your Dark Sky Place. Enter your handheld Sky Quality Meter (SQM) readings for this reporting period in this table. The first measurement is always inaccurate due to a device error, so discard or do not record the initial measurement. Then, record five readings at each site and provide the average for each location. Please note the weather conditions or any unusual environmental/astronomical conditions at the time of your observations. Start entering data in the first available 'replicate' section. You may add more locations by inserting additional rows. To add in additional replicates, simply highlight a full replicate section and copy and paste below.

SQM Model	Unihedron	SQM Serial Number	-1.19.0F9a	Version (SQM or SQM-L)	SQM	Total SQM Average for all	21.67	Total SQM Median for all	21.70										
	Date (DD/MM/YYYY) and Time Zone	Location Name	Geographic Coordinates - Latitude (in decimal degrees)	Geographic Coordinates - Longitude (in decimal degrees)	Time (24- hour clock)	SQM Reading - 1	SQM Reading - 2	SQM Reading - 3	SQM Reading - 4	SQM Reading - 5	Location Average	Location Median	% Cloud Cover	% Moon Visibility	Air Temperature (report F or C)	Other notes
